

SOFTWARE REQUIREMENTS FOR THE STRIKE RICH GAME

OVERVIEW

This document describes requirements for the software implementation of an amazing game called Strike Rich. A description of the game plus the requirements are provided below.

THE GAME

Name of the game: Strike Rich

Goal: discover the diamond

When the start button is pressed, the instructions are displayed and the start button changes to a go button. If the go button is pressed, the farmer moves to the first island.

If you choose to click on the island, the farmer digs a hole. Three things could happen to the farmer.

- 1) you fall into the water and the game is over.
- 2) you find nothing
- 3) you find the diamond and you win.

You continue to the next island until you either win or lose.

UI ELEMENTS

Label: on the top of the form with the title of the game

Label: right underneath the title with instructions for the game

12 image place holders that look like island

1 image picture box to hold a picture of a farmer standing on top of the start button

12 picture boxes on top of the pictures of the island with a farmer

A start button that will turn into a go button

GAME REQUIREMENTS

Before Start

- everything is disabled besides for start button.
- The instruction label says press start to begin.

When the start button is pressed

- The first picture box of the island is enabled.
- The first picture box of the farmer becomes visible.
- The instruction label says the poor farmer desperately wants to find the diamond that is hidden deep under one of these islands. He will dig up the islands until he uncovers the diamond. Some of these islands can become flooded with water if dug up, watch out. Click on the island if you choose that the farmer should dig up the island. Click on the go button if you want the farmer to continue to the next island. Good Luck!
- The start button should change to say GO.

If the island is pressed

- The island changes to a different picture A diamond, water or an empty hole.
 - A diamond will cause the instruction label to say YOU STRUCK IT RICH! The game will go back to the way it was before the start button was pressed.

SOFTWARE REQUIREMENTS FOR THE STRIKE RICH GAME

- An empty hole will cause the instruction label to say OOPS! THE FARMER WASTED HIS TIME AND ENERGY. CONTINUE TRYING.
- A hole with water will cause the picture box of the island and farmer to become invisible and instruction label will say THE FARMER DIED A TRAGIC ENDING! The game will go back to the way it was before the start button was pressed.

The game will continue until the farmer either dies or becomes rich.
